PROFESSIONAL SUMMARY

Results-driven Computer Scientist with expertise in **Data Science, Machine Learning, and Full-Stack Development**. Skilled in **Python, Flask, MySQL, React, Node.js, and Next.js**, with a track record of **scaling e-commerce revenue to PKR 1.5M+/month** and delivering **AI-driven applications**. Known for **building end-to-end solutions** that transform data into actionable insights and business impact.

EXPERIENCE

Software Engineering Intern
PayPro Pvt Limited | Jun – Aug 2025

- **Redesigned and deployed company website**, leading end-to-end UI/UX revamp.
- **Developed and integrated frontend UI with backend APIs** for client platforms.
- **Implemented PayPro APIs** across multiple sites, streamlining online payment workflows.
- **Analyzed and visualized sales data in Power BI**, delivering insights to the COO to improve sales team performance.

E-Commerce Analyst & Shopify Store Manager (Part-Time)
Enfanto Pakistan – Karachi | Mar 2023 – Present

- **Scaled revenue to PKR 1.5M+/month** through data-driven product optimization, trend analysis, and marketing decisions.
- Optimized product listings using **Shopify Analytics**, achieving a **20%+** increase in conversion rates.
- Managed and executed **Meta Ads campaigns** to drive targeted customer acquisition.

EDUCATION

B.Sc. Computer Science — FAST–NUCES, Karachi | 2022 – Present

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML5, CSS3
Frameworks & Libraries: Flask, FastAPI, React, Node.js, Next.js, Pandas, Scikit-learn, TensorFlow
AI/ML: CNNs, NLP, RAG Systems, YOLOv8, OpenCV, LangChain
Databases & Tools: MySQL, ChromaDB, Power BI, Git, Jupyter Notebook, Microsoft Dynamics
Other: REST APIs, JWT Auth, Web Scraping, ETL Pipelines, Data Visualization

PROJECTS

IntelliHire — AI-Powered Candidate Screening System (Final Year Project) (Github)

- **Engineered IntelliHire**, a full-stack AI interview automation platform (Flask, React TypeScript, MySQL) integrating LLM-powered RAG question generation (Google Gemini + LangChain).
- Implemented real-time **STT/TTS pipeline, AI answer evaluation, and multi-modal candidate scoring** (verbal, visual, content-based analysis).
- Built an **AI-driven proctoring system** using YOLOv8 (mobile detection), gaze tracking, and browser tab monitoring to ensure interview integrity.

Emotion Recognition System (Github)

- Developed a CNN trained on 28K+ facial images for real-time emotion classification.
- Built live inference pipeline using OpenCV for webcam-based prediction.

Car Showroom Management App (Github)

- Developed full-stack Flask + MySQL system for car inventory management.
- Implemented secure authentication and optimized CRUD operations.
